RE: public comment to DOI/MMS "scoping" of programmatic EIS;
benefits/costs/risks to IMMEDIATE PERMITTING of CW
I'm NOT an official or representative to any organization but a Cape Cod
ratepayer, taxpayer, & US citizen concerned about renewable energy uses.

Congressman Delahunt: 28 May 2006
You and the group de Boston should be fined and imprisoned for
willful gross negligence and causing harm that increases over time.
Every day without CW is 420 megawatt lost electricity for your district.
Cape + Islands are energy cul-de-sacs with tourist/retirement
economies. Our current electric costs are 36% above the national average.
We respond heroically to crisis but what chance would we have without
indigenous electricity? You broker deals with Chavez and even Jim Gordon & Villia
for threaten "interminable litigation" from CW's "gold rush" yet go
silent on the health effects of that filthy Mirant power plant in
Sandwich and Plymouth's nuclear P.P. CW is an AMERICAN
company who would own, operate and manage renewable KE. CW's
builder, Jay Cashman, is bringing jobs to Quincy. No thanks to you.

I can't believe you served in the CE Reserves! You supported
that amendment to the reauthorization (money) after three last year
of service? You know the Sound's Channel runs west to east and
that 130 modern turbines are a necessary aid to navigation for
those Stinks pots that CE must remove. You know the shoals
were stripped by draggers and weirs two generations ago. Ever
heard of the Law of the Sea? Lock up Act 33 or propaganda
aimed at affecting the defense or security of the resources
of a coastal state. Actionable, ditto constitutional prohibitions
arising from a Bill of Attainder, rule of law, a slander.

CW would decrease industrial traffic of fuel deliveries and
save us all from yet another accident. Horseshoe is where
the best wind is. CE had say over marking, lighting safety and
need to file determinations ASAP. CW has a complete record.

Give me my fore hundred'n twenree megawatt of electricity. I use
less nowadays but I'll vote against you + the Senator from
SPAMALOT this year. Wind is a blessing from the
Creator. Waste is a sin. Look beyond your visible
horizon and serve your constituents. —BC
